

Hands-on Lab: Simple SELECT Statements

Skills
Network

Estimated time needed: 20 minutes

In this lab, you will learn one of the most commonly used statements of SQL (Structured Query Language), the SELECT statement. The SELECT statement is used to select data from a database.

Objectives

After completing this lab, you will be able to:

- Query a database to obtain a response as a result set
- Retrieve all or selected columns of a dataset
- Apply criteria commands to filter the result set

Software Used in this Lab

In this lab, you will use Datasette, an open source-tool for exploring and publishing data. You can visit the [Datasette GitHub repository here](#).

Working with Datasette

The **Datasette** tool offers a platform to input and execute SQL queries. By clicking the **Submit query** button, you can execute the SQL query.

The screenshot shows the Datasette web interface. At the top, there's a breadcrumb "home / SanFranciscoFilmLocations". Below it, the title "Practice SQL" is displayed. The "Database:" field is set to "SanFranciscoFilmLocations". A text input field contains the SQL query "SELECT * FROM FilmLocations;". Below the input field, a tip reads "Tip: Autocomplete with Ctrl+Enter or Cmd+Enter". A red rectangular box highlights the "Submit query" button. On the right side, there is a vertical button labeled "Support/Feedback". At the bottom, a footer says "Powered by Datasette".

Database Used in this Lab

The database used in this lab comes from the following dataset source: [Film Locations in San Francisco](#) under a [PDDL: Public Domain Dedication and License](#).

Exploring the Database

Let's first explore the **SanFranciscoFilmLocations** database using the **Datasette** tool:

1. If the first statement listed below is not already in the Datasette textbox on the right, then copy the code below by clicking on the little copy button on the bottom right of the code block below and then paste it into the textbox of the Datasette tool using either **Ctrl+V** or right-click in the text box and choose **Paste**.

```
SELECT * FROM FilmLocations;
```

home / Practice SQL / SanFranciscoFilmLocations

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT * FROM FilmLocations;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

2. Click **Submit Query**.
3. Now, you can scroll down the table and explore all the columns and rows of the **FilmLocations** table to get an overall idea of the table contents.

Title	ReleaseYear	Locations	FunFacts	ProductionCompany	Distributor	Director	Writer	Actor1	Actor2	Actor3
180	2011	Epic Roasthouse (399 Embarcadero)		SPi Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddarth	Nithya Menon	Priya Anand
180	2011	Mason & California Streets (Nob Hill)		SPi Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddarth	Nithya Menon	Priya Anand
180	2011	Justin Herman Plaza		SPi Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddarth	Nithya Menon	Priya Anand
180	2011	200 block Market Street		SPi Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddarth	Nithya Menon	Priya Anand
180	2011	City Hall		SPi Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddarth	Nithya Menon	Priya Anand
180	2011	Polk & Larkin Streets		SPi Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddarth	Nithya Menon	Priya Anand
180	2011	Randall Museum		SPi Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddarth	Nithya Menon	Priya Anand

4. These are the column attribute descriptions from the **FilmLocations** table:

```
FilmLocations(  
Title:           titles of the films,  
ReleaseYear:     time of public release of the films,  
Locations:       locations of San Francisco where the films were shot,  
FunFacts:        funny facts about the filming locations,  
ProductionCompany: companies who produced the films,  
Distributor:     companies who distributed the films,  
Director:        people who directed the films,  
Writer:          people who wrote the films,  
Actor1:          person 1 who acted in the films,  
Actor2:          person 2 who acted in the films,  
Actor3:          person 3 who acted in the films  
)
```

Using SELECT statement

Now, let's go through some examples of SELECT queries.

1. Suppose we want to retrieve details of all the films from the **FilmLocations** table. The details of each film record should contain all the columns. The query statement for this is:

```
SELECT * FROM FilmLocations;
```

Copy the solution code above and paste it to the textbox of the Datasette tool. Then click **Submit query**.

home / Practice SQL / SanFranciscoFilmLocations

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT * FROM FilmLocations;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Your output resultset should match like the image below:

Database: SanFranciscoFilmLocations

1 SELECT * FROM FilmLocations;

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

SELECT * FROM FilmLocations

Title	ReleaseYear	Locations	FunFacts	ProductionCompany	Distributor	Director	Writer	Actor1	Actor2	Actor3
180	2011	Epic Roasthouse (399 Embarcadero)		SP Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddharth	Nithya Menon	Priya Anand
180	2011	Mason & California Streets (Nub Hill)		SP Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddharth	Nithya Menon	Priya Anand
180	2011	Justin Herman Plaza		SP Cinemas		Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba	Siddharth	Nithya Menon	Priya Anand

2. We want to retrieve the film names and director and writer names. The query now would be:

```
SELECT Title, Director, Writer FROM FilmLocations;
```

Copy the solution code above and paste it to the textbox of the Datasette tool. Then click **Submit query**.

home / Practice SQL / SanFranciscoFilmLocations

Practice SQL

Database: SanFranciscoFilmLocations

1 SELECT Title, Director, Writer FROM FilmLocations;

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Your output resultset should match the image below:

Practice SQL

Database: SanFranciscoFilmLocations

1 SELECT Title, Director, Writer FROM FilmLocations;

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

SELECT Title, Director, Writer FROM FilmLocations

Title	Director	Writer
180	Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba
180	Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba
180	Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba
180	Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba
180	Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba
180	Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba
180	Jayendra	Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba

3. We want to retrieve film names along with filming locations and release years. But we also want to restrict the output resultset to retrieve only the film records released in 2001 and onwards (release years after 2001, including 2001).

```
SELECT Title, ReleaseYear, Locations FROM FilmLocations WHERE ReleaseYear>=2001;
```

Copy the solution code above and paste it to the textbox of the Datasette tool. Then click **Submit query**.

home / Practice SQL / SanFranciscoFilmLocations

Practice SQL

Database: SanFranciscoFilmLocations

1 SELECT Title, ReleaseYear, Locations FROM FilmLocations WHERE ReleaseYear>=2001;

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Your output resultset should match the image below:

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT Title, ReleaseYear, Locations FROM FilmLocations WHERE ReleaseYear>=2001;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

SELECT Title, ReleaseYear, Locations FROM FilmLocations WHERE ReleaseYear>=2001

Title	ReleaseYear	Locations
180	2011	Epic Roasthouse (399 Embarcadero)
180	2011	Mason & California Streets (Nob Hill)
180	2011	Justin Herman Plaza
180	2011	200 block Market Street
180	2011	City Hall
180	2011	Polk & Larkin Streets
180	2011	Randall Museum
180	2011	555 Market St.
24 Hours on Craigslidet	2005	
About a Boy	2014	Broderick from Fulton to McAllister

Practice exercises on the SELECT statement

1. Retrieve the fun facts and filming locations of all films.

▼ Click here for a hint

Follow example 2 of SELECT, where records containing details of some particular columns have been retrieved.

▼ Click here for the solution

```
SELECT Locations, FunFacts FROM FilmLocations;
```

▼ Click here for the output

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT Locations, FunFacts FROM FilmLocations;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

SELECT Locations, FunFacts FROM FilmLocations

Locations	FunFacts
Epic Roasthouse (399 Embarcadero)	
Mason & California Streets (Nob Hill)	
Justin Herman Plaza	
200 block Market Street	
City Hall	

Polk & Larkin Streets	
Randall Museum	
555 Market St.	
Embassadors	Embassadors Freeway, which was featured in the film

2. Retrieve the names of all films released in the 20th century and before (release years before 2000 including 2000), along with filming locations and release years.

▼ Click here for a hint

Follow example 3 of SELECT, where we restricted the output resultset to retrieve only the film records with certain release years. Use WHERE clause comparison operator `<=`, which means **Less than or equal to**.

▼ Click here for the solution

```
SELECT Title, ReleaseYear, Locations FROM FilmLocations WHERE ReleaseYear<=2000;
```

► Click here for the output

3. Retrieve the names, production company names, filming locations, and release years of the films not written by James Cameron.

▼ Click here for a hint

Use WHERE clause comparison operator `<>`, which means **Not equal to**.

▼ Click here for the solution

```
SELECT Title, ProductionCompany, Locations, ReleaseYear FROM FilmLocations WHERE Writer<>"James Camer
```

► Click here for the output

Conclusion

Congratulations on completing this lab!

You are now able to:

- Query a database using SELECT statements
- Retrieve all or selected columns of data
- Filter the query response to meet a defined criteria
